MEASURES TAKEN BY MEMBER STATES

1. SUMMARY

Member States reported a significant number (80) of measures in 2016 on the protection of the EU's financial interests and the fight against fraud, reflecting the adoption of the bulk of Union legislation for the new programming period 2015-2020. Member States were invited to report a maximum of three (most important) anti-fraud measures. This analysis therefore gives a good overview of trends and priorities in the anti-fraud measures implemented by Member States but is not exhaustive.

Member States' measures covered the entire anti-fraud cycle, mostly in the area of shared management and control of EU funds, followed by measures on public procurement, conflict of interest, corruption, AFCOS, financial crime, definition of fraud, anti-fraud strategy, organised crime and whistle-blowers. Concerning the anti-fraud cycle, most of the measures concerned the prevention stage, followed by detection, investigation and prosecution, recovery and sanctions. The majority of measures were sectoral (73%) rather than horizontal (27%). Of these sectoral measures, twenty concerned revenue in the fields of tax fraud (60%) and customs (40%). Forty-one measures concerned expenditure in a broad range of budgetary areas (cohesion policy, agriculture, fisheries, fund for the most deprived, centralised direct expenditure, migration and asylum, globalisation fund).

2. HORIZONTAL ANTI-FRAUD INITIATIVES AND MEASURES BY MEMBER STATES

2.1 PROGRESS ON THE DEVELOPMENT OF NATIONAL ANTI-FRAUD STRATEGIES¹ IN 2016

By the end of 2016, a total of nine Member States had adopted a National Anti-Fraud Strategy and transmitted it to the Commission². This represents an increase in the number of National Anti-Fraud Strategies (NAFS) compared to 2015. Moreover, this demonstrates the commitment of Member States to adopt a strategic approach towards combatting fraud and irregularities detrimental to the EU's and national budgets. The Commission welcomes these developments and invites all other Member States to follow the example and establish NAFS in the near future based on the Guidelines prepared (in collaboration with Member States experts).

Figure 6: NAFS: State of play

A National Anti-Fraud Strategy allows for structuring the fight against fraud affecting EU and national budgets at the Member State level. It helps to identify vulnerabilities to fraud in the systems, assess the main fraud risks, set and implement responses; evaluate progress made,

¹The Commission invites Member States to consult the General Guidelines on National Anti-Fraud Strategies when starting the procedure of establishing a NAFS.

² The nine Member States are: *Bulgaria, Croatia, Czech Republic, France, Greece, Hungary, Italy, Malta and Slovakia*. In addition, *Latvia and Romania* have adopted NAFS and transmitted it to OLAF in the first quarter of 2017. Besides, *Belgium, Netherlands and Poland* reported that the procedure to establishing a NAFS is on-going; *Austria and Lithuania* indicated the adoption of specific strategic documents in this respect.

adapt the response to the evolution of the fraud trends and the resources available, and ensures the involvement of all relevant stakeholders in particular by means of enhanced collaborative and coordinated actions. A NAFS also helps to ensure harmonisation of the response to fraud risks throughout the country, especially in the case of a decentralised management structure.

The benefits of a National Anti-Fraud Strategy include:

- ✓ Ensuring the effective and efficient protection of the EU financial interests (i.e. improving the prevention, detection and fight against corruption and any other illegal activities affecting the financial interests of the Union);
- ✓ Setting out a better working framework upon which the institutions involved in the process of implementation and control of EU funds could work together to improve administrative capacity and determine more precisely the roles and responsibilities of the institutions involved. This would ensure effective co-ordination of legislative, administrative and operational activities of the institutions;
- ✓ Achieving a higher degree of recovery of unduly spent funds from the budget of the European Union and contributing to proportionate and dissuasive penalties in accordance with the applicable law.

While most strategies cover all EU funds, certain strategies concentrate on structural, agricultural or other specific funds. The questionnaire offered Member States the opportunity to provide further information about the procedure for establishing a NAFS, and these are detailed below as follows:

- **BELGIUM:** At present there is no national coordination of the anti-fraud strategies applied by the various departments concerned, but the possibility of drafting a NAFS is being analysed. A legal framework regulating the functioning of AFCOS and cooperation with all the departments concerned is currently being drafted.
- **CZECH REPUBLIC:** The NAFS specifically covers legislation governing public procurement.
- **GREECE:** Updated of the action plan of their NAFS and stated that integrated the actions in their national management and control system.
- **FRANCE:** On 14 September, the Minister for Finance adopted the first-ever national multiannual plan to tackle fraud against public finances. This plan is structured around five strategic priorities and includes specific measures relating to EU funds. These measures relate to risk mapping and investigation techniques, with an alert platform created for the European Social Fund (ESF) and information exchanged to prevent double financing under the European Agricultural Fund for Rural Development (EAFRD).
- **CROATIA:** As stated in the PIF report 2014, the Republic of Croatia adopted its National Anti-Fraud Strategy in the field of protection of EU financial interests for the period 2014-2016 in January 2014. The purpose of the strategy was to ensure effective

and efficient protection of the EU financial interests by strengthening the ability of the AFCOS system in the Republic of Croatia to carry out predefined measures and achieve the set objectives. The Strategy foresaw the drafting of an Irregularity and Fraud Risk Management Methodology which was developed by the Service for Combating Irregularities and Fraud, Ministry of Finance in 2016. All AFCOS system bodies in the Republic of Croatia (Irregularity Reporting System bodies, AFCOS-service and AFCOS-Network bodies) are obliged to conduct risk assessments in accordance with the methodology. The results of the risk assessment will be taken into account in the new National Anti-Fraud Strategy and will eventually lead to the updating and amending of existing Guidelines, existing legislation etc. Additionally, training needs analysis conducted in accordance with the Training Needs Analysis Methodology for the period 2017-2019 will also, along with a Fraud Risk Management Methodology, provide inputs for developing a new National Fraud Strategy.

- **LATVIA:** The AFCOS Latvia Operational Strategy and Action Plan 2017-2019 was adopted on 16 January 2017. The strategy identifies three main objectives: policy planning, internal and external coordination and fraud prevention activities. The Strategy will be revised and updated at least once per year.
- **LITHUANIA:** A National anti-corruption programme for 2015-2025 that contains anti-corruption and anti-fraud measures and activities relating to the use of EU funds.
- **MALTA:** The NAFS covers both local requirements and international obligations.
- **AUSTRIA:** Adopted a national revenue strategy as part of the overall business strategy of the Federal Ministry of Finance.
- **POLAND:** Given the specific nature of the implementation of EU funds in Poland, the size of allocations and the number of institutions involved in the process of the protection of the EU's financial interests against fraud, Poland considers that it is not appropriate to create one general national strategy. Poland is therefore working on several separate sectorial strategies drawn up by the competent national institutions and adapted to the specific nature of the area at issue.
- **PORTUGAL:** Anti-fraud strategies were approved as part of the 2014-2020 operational programmes for the European Structural and Investment Funds (ESIF). The Strategic Plan to Combat Tax and Customs Fraud and Evasion 2015-2017 (Revenue) was approved on 1 January 2015. A cross-cutting National Anti-fraud Strategy covering all areas is currently being consolidated, since the fight against fraud is a pressing concern for all the national authorities involved. We also wish to highlight the cooperation agreement between the IGF, in its capacity as AFCOS, and the Portuguese Attorney-General's Office, which is in the final stages of preparation.
- **ROMANIA:** Currently has an ongoing procedure for a new NAFS covering the 2017-2023 period, as the NAFS covering the period before its accession to EU (2007) is no longer valid. The anti-fraud department DLAF is responsible for drawing up the National Anti-Fraud Strategy (NAFS) and coordinating its implementation. DLAF prepared the draft NAFS and, in April 2016, sent it to the national bodies involved in the protection of the financial interests of the EU in Romania and asked for their

support in developing and implementing the strategy. Specifically, DLAF asked each of those bodies to examine the documents and make proposals and comments; fill in the section that concerned it with relevant information and propose new measures falling within its remit to meet the objectives set out. The draft NAFS was also submitted to the European Anti-Fraud Office (OLAF) for comments and proposals. DLAF has collected and analysed all the replies that it has received, including OLAF's. DLAF is now taking the following steps to complete the adoption of the Romanian NAFS: updating the NAFS with proposals, adding any necessary information (deadlines, indicators, competent persons, budgetary impact etc.); submitting the updated, complete NAFS to public debate; preparing the final version of the NAFS, submitting the NAFS for adoption by Government Decision; implementing the NAFS; reviewing and updating the NAFS.

- **UNITED KINGDOM:** Considers that one strategy covering the various sectors of Agriculture, Structural Funds and Own Resources is not suitable to the situation in the UK. Instead, the UK finds that the best way to fight fraud is for each sector to produce and implement individual strategies to suit their own particular needs.

Background to NAFS

The new Multiannual Financial Framework applicable to the programming period 2014-2020 has been strengthened as regards fraud risk assessment, fraud prevention and detection. For shared management the sectoral Regulations require Member States to put in place effective and proportionate anti-fraud measures, taking into account the risks identified, to take the necessary steps to prevent, detect and sanction fraud and irregularities effectively and to reimburse irregular amounts to the EU budget. However, going beyond the immediate regulatory requirements and embedding these anti-fraud measures in a National Anti-Fraud Strategy (NAFS) is encouraged in order to ensure better monitoring of the fight against fraud detrimental to the financial interests of the EU and that of the Member States, as well as to ensure homogenous and effective practices, especially where the organisational structures are decentralised.

In the last two years, the COCOLAF Fraud Prevention Group focused on various aspects of the NAFS topic. First, as a pilot project, the working group in 2014 prepared the 'Guidelines for National Anti-Fraud Strategies for European Structural and Investment Funds (ESIF)'. These guidelines laid down the foundation for drafting a National Anti-Fraud Strategy, however with a limited scope on expenditure in the field of ESIF. In the following year, another working group was set up to target the practical side of NAFS. As a result, in 2015 the document called 'Practical steps towards drafting of a National Anti-Fraud Strategy' was issued together with a practical tool in the form of an xls file that can be used to carry out the assessment of the state of play with regard to the current measures in place, taking into account all the four stages of the anti-fraud cycle.

The current guidelines represent an update of the NAFS guidelines issued in 2014. The working group in 2016 aimed at revising as well as enlarging the previous guidelines for the NAFS so that it become a horizontal document covering all shared management expenditure: European Structural and Investment Funds (ESIF), Agriculture, Home Affairs Funds (AMIF/ISF) and Fund for European Aid to the Most Deprived (FEAD). In addition, the guidelines were enriched with a number of concrete examples of Member States' practice that have proven to be successful.

2.2 AFCOS

Most of the anti-fraud measures taken by Member States in 2016 were horizontal and did not target a specific budgetary area.

Denmark - AFCOS anti-fraud manual

Denmark drafted a manual for cooperation in the Danish anti-fraud network (AFCOS network). This targeted the *prevention detection; investigation and prosecution* stages of the anti-fraud cycle and covered the areas of *AFCOS, customs/TOR/Illicit trade and shared management/control of EU funds*. The manual provides a comprehensive horizontal overview of the authorities' work to combat fraud involving EU funds, the cooperation in the network and cooperation between the Danish authorities and OLAF. It covers a wide range of issues including: the legal basis in EU law for fighting fraud, national provisions, the conduct of tasks, the organisation of anti-fraud work in the AFCOS network's authorities, horizontal cooperation across authorities in the AFCOS network and procedures for transferring cases to the Public Prosecutor for Serious Economic and International Crime (SØIK).

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral
Prevention	AFCOS, customs, shared management and control of EU funds	Single	Administrative	N	Management of funds; monitoring/desk checks; on the spot checks; irregularities reporting; other	To clarify or consolidate existing rules; cross-cutting measure, multi-agency measure/ measure with impact on various bodies	H
Detection							
Investigation and prosecution							

France - AFCOS

France adopted a national anti-fraud strategy at the French anti-Fraud Coordination Service (AFCOS). This measure covers the full range of the anti-fraud cycle from *prevention, detection, investigation and prosecution to recovery and sanction* and includes the areas of *AFCOS and antifraud or anti-corruption strategy*. It is the first time that this strategy is multiannual and in addition to measures relating to social security fraud and tax fraud (VAT

fraud), it also includes specific measures relating to EU funds. The aim is to improve risk analysis of relevant stakeholders, but also to develop new detection tools, such as an alert platform for the ESF. These measures are multiannual and will be implemented over a three year period from 2016 to 2018. The national strategy includes an organisational measure which consists in creating an alert platform for the ESF, as well as a committee tasked with the examination of any alerts received. In addition, the national strategy includes measures to ensure that information relating to the ESF and the EAFRD will be cross-referenced between management authorities and national administrations. There are also measures aimed at improving knowledge of the risks relating to paying agencies of EU funds by developing risk maps. Finally, in terms of revenue, the fight against intra-Community VAT fraud is also improved by better systems for cross-referencing information between customs and the tax administration.

Recovery and sanction							

Croatia - AFCOS

Croatia's Service for Combating Irregularities, Fraud Irregularity and Fraud Risk developed a management methodology to promote the *fraud prevention* function of the Croatian *AFCOS*. Irregularity Reporting System bodies, AFCOS Service (Service for Combating Irregularities and Fraud) and AFCOS-Network bodies are obliged to conduct assessment of risks related to irregularities and fraud in line with their competences. The purpose of the methodology is to provide instructions and tools for irregularity and fraud risk management in agriculture, fisheries and cohesion expenditure. It is expected to support the identification of the riskiest projects, assessment of exposure of managing authority and certifying authority to fraud risks, assessment of exposure of AFCOS to risks threatening its objectives and identification and implementation of corresponding risk mitigation measures.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reason for measure	Horizontal / sectoral
Prevention	AFCOS; other	Single	Administrative	A	Management of funds	To enhance existing measure	S

Latvia - AFCOS

Latvia drafted the AFCOS Latvia Operational Strategy and Action Plan 2017-2019. The Strategy is set up for three years and revised annually in the AFCOS Council. The monitoring of implementation is under AFCOS responsibility, however the actions are implemented in cooperation with other competent authorities. The Strategy targets the *fraud prevention* stage of the anti-fraud cycle and focuses on policy making, coordination and cooperation matters, as well as fraud prevention trainings, public awareness and involvement in the OLAF Anti-Fraud Co-ordinator's Network (OAFCN). Concerning the area of *fraud definition*, the criminal law evaluation working group concluded that no amendments are needed regarding specific terms to the EU funds as the current law entails all the necessary points but under different articles. The focus shall be on the institutions who are applying the terms in practice (investigators, prosecutors) and to work on common interpretation of terms and respective application.

Latvia also introduced a series of additional horizontal *fraud prevention* measures:

- ✓ AFCOS representation and participation in the OLAF communicators' network and other meetings, ensuring national participation and representation at the respective level meetings.
 - ✓ Identified existing regulatory framework, the necessary functions and the competent authorities in order to determine whether any changes /amendments are needed to ensure that the Administrative Cooperation Agreement with OLAF is executed properly.
 - ✓ Prepared and signed ACA.
 - ✓ Communicated and exchanged information between all competent authorities.
- Communicated on preventive measures with the public on antifraud issues in accordance with Anti-Fraud Communicator's Network (OAFCN) initiatives. Obtained indication of the public's perception and awareness, as well the possible levels of fraud in Latvia in order to determine future courses of action to fraud prevention.

Malta - AFCOS

Malta also improved its relationships with various AFCOS services from different EU Member States by participating in a study visit in Riga, Latvia between 31 May till 3 June, hosting a round table with AFCOS Italy between 24-26 August, hosting AFCOS Bulgaria 26-30 September and participating in a study visit in Sofia, Bulgaria between 10-13 October. This measure targeted the *prevention, detection, investigation and prosecution* stages of the anti-fraud cycle and the areas of *public procurement, fraud definition, AFCOS, customs, shared management*.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

Detection							
Investigation and prosecution							

Netherlands - AFCOS

Netherlands set up an AFCOS-team by merging three different units: the unit which deals with OLAF cases, the Customs fraud unit and the excise fraud unit. The main tasks of this 25 person AFCOS-team are to work together with OLAF on fraud cases, and to settle incoming information in such a way as to investigate and pursue as many criminal companies as possible. The Dutch AFCOS-fraud unit has all the necessary expertise to set up strong anti-fraud activities. One of the subtasks of this team is to raise internal and external awareness on the importance of a strong anti-fraud policy.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral
Prevention	AFCOS; customs	Package	Organisational	N	Competence; inter-agency co-operation	Increased resources	S
Detection							
Investigation and prosecution			Operational	N	Risk indicators; increased number of checks	Enhanced coordination, cooperation, information flow, ex-ante and ex-post controls; targeting of checks and investigations	S

Finland - AFCOS

Finland activated the national AFCOS network and improved cooperation and coordination between the national competent authorities in the field of fraud prevention. The Finnish AFCOS organised first coordination meetings for the national authorities in order to enhance the exchange of information and experiences among the responsible bodies. Closer cooperation will result as more coordinated actions and participation in the OLAF activities. This measure targeted the *fraud prevention stage* of the anti-fraud cycle in the area of *AFCOS, customs and shared management*.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral
Prevention	AFCOS; customs; shared management and control of EU funds	Package	Organisational	A	Inter-agency cooperation	Neutral on resources	H

2.3 PUBLIC PROCUREMENT

Progress was made in the area of public procurement. Indeed by 18 April 2016, EU Member States had to transpose the following three directives into national law:

- **Directive 2014/23/EU on the award of concession contracts**
- **Directive 2014/24/EU on public procurement**
- **Directive 2014/25/EU on procurement by entities operating in the water, energy, transport and postal services sectors**

Bulgaria - Public procurement

Bulgaria adopted the Public Procurement Act to target *fraud prevention and detection* in the field of *public procurement and corruption*. This is a new framework act transposing Directives 2014/24/EU and 2014/25/EU and other directives applicable in the field of public procurement. The Regulation for implementation of the Public Procurement Act was also adopted by the Council of Ministers. It set outs provisions laying down rules that are to be referred to in implementation of the Act or are essential for its implementation.

The new Public Procurement Act also stipulates: national rules for public procurements under the Directives' thresholds, wide preliminary control by the Public Procurement Agency, e-procurement, centralized procedures, establishment of Methodological Committee for unifying the practice of the Control Bodies and new administrative penalty rules.

Czech Republic - Public procurement

Czech Republic also took steps to harmonise national legislation with EU legal provisions fraud prevention in the *recovery and sanction* stage of the anti-fraud cycle and covering the fields of *public procurement, corruption, conflict of interest* for the following laws:

- ✓ Directive 2014/24/EU of the European Parliament and of the Council of 26 February 2014 on public procurement and repealing Directive 2004/18/EC.
- ✓ Directive 2014/25/EU of the European Parliament and of the Council of 26 February 2014 on procurement by entities operating in the water, energy, transport and postal services sectors and repealing Directive 2004/17/EC.
- ✓ Directive 2014/23/EU of the European Parliament and of the Council of 26 February 2014 on the award of concession contracts.
- ✓ Directive 2014/55/EU of the European Parliament.
- ✓ Act No 134/2016 on public procurement. 2016 Action Plan to Fight Corruption
- ✓ Draft Act amending Act No 159/2006 on conflict of interest, as amended, and other related acts.
- ✓ Clarification of the conditions for conflict of interest and its consequences, the obligation of tenderers to disclose their ownership structure, clarification of the conditions for market consultations, under which the contracting authority consults entities pursuing commercial activities on the conditions of a tender procedure beforehand.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

Recovery and sanction							

Greece - Public procurement

Greece adopted a new legislative framework for public procurement targeting the *prevention and detection* stages of the anti-fraud cycle in the areas of *public procurement and conflict of interest*. The framework adopted on 8 August 2016 transposes Directives 2014/24/EU and 2014/23/EU and codifies, consolidates and simplifies the pre-existing institutional framework for public procurement in a single piece of legislation. Law 4413/2016 transposes Directive 2014/23/EU on concessions into Greek law.

Prevention	Public procurement; conflict of interest; other	Single	Legislative	N/A	Other	To remedy flaws; to enforce the rules in line with developments in EU law; other	H
Detection							

Spain - Public procurement

Spain also took steps to transpose the European Directives on public procurement to boost the *prevention* stage of the anti-fraud cycle in the areas of *public procurement, corruption, conflict of interest*. The draft law on public-sector contracts, which transposes into Spanish law Directives 2014/23/EU and 2014/24/EU of the European Parliament and of the Council of 26 February 2014 was approved. In addition, the draft law on procurement procedures in the water, energy, transport and postal services sectors which transposes into Spanish law Directive 2014/25/EU of the European Parliament and of the Council of 26 February 2014 was approved. The measure covers all aspects of public procurement including the definition of the subjective and objective scope of application, the principles that should govern tenders, bans on contracting, the definition of the subject of the contracts, procedures and criteria for awarding the contract, procedures for dealing with breaches of contract law, disclosure and transparency of contracts, amendments to contracts, subcontracting and contract enforcement. The measures taken include the following: (1) an obligation to prevent, detect and resolve conflicts of interest; (2) an extension of the ban on contracting due to incompatibility to cover relatives in the ascending and descending lines and second-degree relatives; (3) the abolishment of the negotiated procedure without publication based on volume; (4) the inclusion of all political parties, unions and employers' organisations in the scope of the law; (5) a reinforcement of special appeals relating to procurement procedures; (6) the tightening up of rules concerning contracting authorities that are not public bodies and awards to in-house providers.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure	Horizontal / sectoral
Prevention	Public procurement; corruption; conflict of interest	Single	Legislative	N	Other	To enforce the rules in line with developments in EU law	S

France - Public procurement

France took measures addressing transparency of companies participating in public procurement. For example: white lists (lists of companies with a high level of transparency and integrity during participation in public procurement), debarment/black lists (preventive instrument - exclusion from public contracting including procurements), international collaboration (sharing information and collaboration in order to avoid double funding, debarment lists, joint investigations and exchange of best practices, etc.), 'four-eye principle' (requirement that a business transaction should be approved by at least two individuals) and other.

Cyprus - Public procurement

Cyprus implemented Regulations (KDP138/2016) on Managing the Implementation of Public Procurement Procedures and the Exclusion of Economic Operators from Contract Procedures, which includes:

- ✓ Approval of changes to and claims regarding public contracts by competent bodies on the basis of specified financial limits, provided that the conditions laid down in the relevant European directives are met.
- ✓ Procedure for receiving supplies.
- ✓ Procedure for assessing contractor performance.
- ✓ Procedure for excluding economic operators from contract procedures.

Latvia - Public procurement

Latvia completed preparatory work to transpose EU Procurement Directives into national law. Measures were taken by the Managing Authorities to update internal procedures, improve information systems, set up a working group for risk management and for certain measures in the field of Public Procurement (legislation and trainings). The main amendments to national Public Procurement law during 2016 were the automatic exclusion of candidates or tenderers found guilty in criminal offences such as participating in a criminal organization, bribery, fraud, money laundering or terrorist financing and trafficking in human beings. All contract

information must now be published. This measure targets the *prevention, detection, recovery and sanction* stages of the anti-fraud cycle in the areas of *public procurement, corruption, conflict of interest and shared management*.

Latvia also carried out preparatory work to implement the electronic procurement procedure that is already available but not obligatory. There are certain conditions for public institutions and the regional councils to use the common procurement institutions services to obtain goods/services. Measures to improve the transparency of companies include some regulation for abnormally low tenders, and ensuring that verifications for average hourly rate are made according to minimum rates. Also the public procurement law was clarified on potential conflict of interest where the employee or official who prepares procurement documentation may not participate in the tender. Latvia has focused its update of existing public procurement procedures and checklists on setting up working groups, improving the reporting system of irregularities, and the discriminatory requirements in tenders. The Procurement Monitoring Bureau organised 32 seminars for 1615 participants on applying the Directives and conflict of interest.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

Hungary - Public procurement

Hungary targeted the *prevention and detection* stages of the Anti-Fraud Cycle in the areas of *public procurement and corruption* with activities carried out by the Public Procurement Authority to combat corruption in the public procurement sector:

- ✓ organising information and training sessions for interested parties: a series of events called the Public Procurement Academy;
- ✓ increased inspection activities: checks on negotiated procedures without publication and on the performance of and changes to public procurement contracts;
- ✓ activities aimed at increasing transparency, e.g. keeping a record of qualified suppliers, keeping a list of prohibited suppliers, and publishing a code of ethics

Detection							

Romania - Public procurement

Romania adopted a new public procurement legislative package transposing the new EU Directives in the field and setting up a mechanism to prevent conflicts of interest in the award of public procurement contracts. This measure targeted the *prevention* stage of the anti-fraud cycle in the areas of *public procurement, corruption and conflict of interest*. The package included: sector-specific procurement, works and service concessions, remedies and means of redress in relation to the award of public procurement contracts, sector-specific procurement contracts and concession contracts for works and services, and the organisation and functioning of the National Complaint Resolution Council (CNSC) and Law setting up a mechanism to prevent conflicts of interest in public procurement procedures.

Where the ex-ante verification procedure identifies a potential conflict of interest in the award of the public procurement contract, the National Integrity Agency (ANI) issues an integrity warning, which it sends to the manager of the entity concerned so that the issue can be rectified. The ‘Prevent’ legislative package launched by the Ministry of Justice in consultation with the National Integrity Agency which does not have a right of legislative initiative is intended to help meet the objectives relating to the prevention of conflicts of interest in public procurement. It has been signed into law by the President of Romania. A new package of four laws transposing the Directives in this field as well as:

- ✓ implementing rules on public procurement;
- ✓ sector-specific procurement;
- ✓ works and service concessions;
- ✓ remedies and means of redress in relation to the award of public procurement contracts;
- ✓ sector-specific procurement contracts and concession contracts for works and services and the organisation and functioning of the National Complaint Resolution Council (CNSC);
- ✓ law setting up a mechanism to prevent conflicts of interest in public procurement procedures.

2.4 FIGHT AGAINST CORRUPTION AND ORGANISED CRIME

Belgium - Preventing bribery

Belgium amended criminal law and criminal procedure criminal sanctions targeting the fraud *investigation and prosecution and recovery and sanction* stages of the anti-fraud cycle, in the area of *corruption*. The Potpouri II Act of 5 February 2016 amended two points concerning bribery:

- ✓ Amendments to the definition of passive bribery (both public and private bribery) - Articles 246 and 504a of the Penal Code
- ✓ Stricter punishment for passive and active bribery of a person who exercises a public function in a foreign state or public international organisation, new article 250 of the Criminal Code.

Recovery and sanction							

France - Fight against corruption

France took a series of measures to fight against corruption in public procurement:

- ✓ Measures addressing transparency in public procurement including disclosure of fraudsters, 'naming and shaming', disclosure of beneficiaries, beneficial owners of the contractors and subcontractors, including advance checking, disclosure of the members of evaluation committees, public disclosure of documents/information (public access to key documents including terms of reference individual bids, evaluation sheets and contracts or amendments to the contracts) and other.
- ✓ Measures to improve the effectiveness of public procurement management. These include publishing the e-procurement procedure online, market-based indicators, specialised or centralised procurement authorities, assessment of anti-corruption measures, corruption statistics, integrity pacts (a tool for preventing corruption in public contracting through contractual clauses, for example an agreement between the government agency offering a

contract and companies bidding for it that they will abstain from bribery, collusion and other corrupt practices for the extent of the contract).

- ✓ Measures to prevent corruption amongst personnel, including management. Personnel administration (transparent recruitment, advance screening, vetting of candidates, rotation in sensitive posts), rules on ethics (codes of conduct, acceptance of gifts), whistle-blowers (protection of witnesses or employees), anti-corruption training and awareness raising, mandatory disclosure of assets, post-employment rules, sanctions (administrative, disciplinary or financial sanctions, debarment, listing of non-reliable staff), leniency/voluntary disclosure programmes (motivation measure, cooperation with the police during investigation etc. in accordance with/encapsulated in competition and criminal law), wiretapping, agents provocateurs.

<i>Lithuania - Fight against corruption</i>
--

Lithuania introduced the Management and Control System for 2014-2020 reinforced by incorporating the Special Investigation Service (STT) – the anti-corruption law enforcement agency responsible for the detection and investigation of corruption related criminal acts and development and implementation of corruption prevention measures. This measure targeted the *prevention and detection* stage of the anti-fraud cycle in the area of *corruption*. In this connection, the Procedure for Exchanging Information on the Suspected Corruption Cases with STT was established and co-implementation of the Operational Programme of the European Union Funds Investments in 2014-2020 by STT was provided for in the national legal acts. The Government of the Republic of Lithuania made the following Resolutions:

- ✓ No. 473 of 11 May 2016 "on the Amendment of the Resolution of the Government of the Republic of Lithuania No. 528 of 4 June 2014, on the Allocation of Responsibilities and Functions among the Institutions Implementing the Operational Programme for the European Union Structural Funds Investments in 2014-2020."
- ✓ No. 485 of 18 May 2016 "On the Amendment of the Resolution of the Government of the Republic of Lithuania No. 1090 of 3 October 2014, on the Adoption of the Rules of Administration of the Operational Programme for the European Union Funds Investments in the 2014-2020" entitles institutions that administer the EU funds to inform STT about suspected corruption cases and obliges STT to inform the managing authority about the start and/or the end of pre-trial investigations.

Romania - Fight against corruption

The following objectives and measures set out in the anti-corruption strategy are of relevance to the fight against fraud: transparency in the management of public resources; management of institutional risks and vulnerabilities; enhancing integrity and reducing vulnerabilities and risks of corruption in priority sectors and fields of activity;

The aim of the 2016-2020 NAS is to promote integrity by applying the legislative and institutional framework rigorously to prevent corruption in Romania. It is a multidisciplinary document addressed to all public bodies representing the executive, the legislature, the judiciary, the local public administrations, the business sector, and civil society. It identifies specific and general objectives for each type of intervention. These are developed through transparency in decision-making and open government.

In conjunction with the sector-specific integrity policies, the previous NAS (2012-2015) brought about, for the first time in the history of public policies in the field, a substantial change in the efficiency of the proposed measures. The results of the anti-corruption measures have had a major impact on the performance of the government and the administration.

The 2016-2020 NAS sets out general and specific objectives for each vulnerability identified by national and international evaluations. The measures laid down in detail by the NAS also include management of institutional risks and vulnerabilities (including whistle-blower protection and the prevention of revolving-doors situations), mitigation of risks of corruption in public procurement and interaction between public bodies and businesses.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

Romania - Fight against organised crime

Romania strengthened the institutional and legislative framework for combating organised crime by making the National Agency for the Administration of Seized Assets (ANABI) operational. This measure targeted the *recovery and sanction* in the area of *organised crime*. This will ensure that ANABI becomes operational as required by Law No 318/2015, which states that the Agency should be fully operational within one year after being set up. By setting up this agency, Romania proposes an integrated approach to the recovery of criminal assets, by combining support for criminal prosecution bodies and courts with international cooperation, effective management of seized assets and social re-use of seized goods and assets.

Operationalisation is a complex process that requires new legislation and various other activities as provided for by law. It was necessary to take these steps in 2016, so as enable the process that started in 2015 to continue normally. For the law to be fully implemented, it was necessary to adopt secondary legislation in 2016.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral
	Organised crime	Single	Legislative	N	Competences; powers; other	To clarify or consolidate existing rules	H
Recovery and sanction							

Slovenia - Fight against economic crime

Slovenia issued guidelines and mandatory instructions for drawing up the **police work plan for 2017**. This measure targeted the *detection, investigation and prosecution* stages of the anti-fraud cycle in the areas of *financial crime, organised crime, corruption, conflict of interest, fraud definition, and shared management*. The guidelines state that the police should continue to detect and investigate economic crime and organised forms of corruption, with particular emphasis on cases that harm the banking system, the budget and EU funds, and cases that result in large-scale material gain, and on stepping up financial investigations and the work of specialised investigation task forces. In cooperation with other authorities, the police continued training for criminal investigators on EU funds in 2016 via the THEMIS training project. The annual police guidelines prioritise:

- ✓ detection and investigation of economic crime and closer interdepartmental cooperation with the national authorities responsible;

Investigation and prosecution							

Czech Republic - Fight against organised crime

Czech Republic also created the National Centre for the Fight against Organised Crime of the Criminal Police and Investigation Service Office of the Police of the Czech Republic. This measure targeted the fraud *detection, investigation and prosecution* stages of the anti-fraud cycle, in the areas of public procurement, financial crime, organisational crime, corruption, AFCOS and smuggling/illicit trade. The Centre emerged from the re-structuring of the Department for the detection of corruption and financial crimes. It is a new national police department in charge of detecting and investigating the most serious forms of crime, inter alia in the area of public procurement, corruption and use of EU funds.

Investigation and prosecution							

Estonia - Compulsory information for analysis

Estonia made the business registry code for the beneficiaries' service providers compulsory in the Estonian Managing Information System (MIS) as of March 2016. This requirement simplifies the mass analysis of data and helps to identify conflicts of interests (related persons and other connections). This measure targeted the prevention and detection stages of the anti-fraud cycle and the area of shared management.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure	Horizontal / sectoral

Detection							

Most of the anti-fraud measures taken by Member States in 2016 were horizontal and did not target a specific budgetary area. Particular progress was made in the area of public procurement.

2.5 OTHER MEASURES

Belgium - Targeting tax havens

Belgium (partially) transposed Directives 2014/86/EU, 2015/121/EU and 2016/1164/EU, in particular by adjusting the applicability of the Dividends Received Deduction (DRF), exempting withholding tax from dividends, introducing a choice between immediate payment or spread payment of exit tax in respect of income tax, and extending reporting obligations for payments to tax havens. The legislative Act reference is: 1 December 2016 (Official Gazette, 8 December 2016) and Programme Act of 1 July 2016.

This measure targeted the fraud *prevention* stage of the anti-fraud cycle.

Prevention	Other	Single	Legislative	A	Other	To enforce the rules in line with developments in EU law; other	S

Estonia - Civil action in a criminal procedure

Estonia added to the Criminal Procedure Code a new provision that enables officials to avoid parallel procedures (criminal and civil) and file the state financial claims in criminal proceedings. The new clause sets out the types of property claims that victims can issue. This

measure targeted the *investigation and prosecution, recovery and sanction* stages of the anti-fraud cycle in the areas of financial crime, customs/TOR/illicit trade, shared management.

Investigation and prosecution							
Recovery and sanction							

Spain - Improved fraud detection

Spain's National Anti-Fraud Coordination Service defined criteria regarding the classification and handling of irregularities and suspected fraud in operations or projects that are the subject of criminal proceedings. This measure targeted the *detection* stage of the anti-fraud cycle in the area of *AFCOS* by establishing guidelines for national authorities managing, certifying and monitoring EU funding on the classification of irregularities such as suspected fraud. The purpose of the guidelines is to ensure that cases are communicated correctly to the European Anti-Fraud Office and followed up properly by the National Anti-Fraud Coordination Service.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reason for measure	Horizontal / sectoral

Detection							

Spain launched a National Subsidy Database (BDNS), which operates as the national subsidy disclosure system for public subsidies and grants (both national subsidies and grants and those financed using European funding). The object is to improve transparency of information on public subsidies (calls for tender, awards, beneficiaries, reimbursements, penalties, etc.) and improve detection of different types of subsidy-related fraud.

This measure targets the *prevention and detection* stages of the anti-fraud cycle, in particular the detection of fraud involving the double funding of the same project or activity. As of 1 January 2016, the BDNS database centralises all information on all public subsidies for which an application procedure was organised and which were granted by State bodies, the Autonomous Communities and local bodies to any beneficiary.

Prevention	Other	Single	Operational	A	IT tools ("IT data feeding", "Other IT")	Enhanced coordination, information flow and ex-post controls; targeting of checks & investigations	S
Detection							

France - Protection of whistle-blowers

France created a general framework for the protection of whistle-blowers providing a general definition and protection under criminal law: invalidity of retaliatory measures taken against them and a numerical index identifying lobbyists, which is shared by the parliamentary assemblies, governmental and administrative authorities and local and regional authorities. The High Authority for Transparency in Public Life will check whether lobbyists have in particular met their ethical obligations and failings will be subject to criminal sanctions. A whistle-blower is defined in order to cover a broad range of alerts: any domain in which a crime or offence occurs, a serious and manifest breach of an international commitment duly ratified or approved by France, a unilateral legal instrument of an international organisation adopted on the basis of such a commitment, the law or a regulation, or a threat or serious damage to the general interest. The implementation of procedures for collecting alerts from staff members or freelancers is compulsory.

Croatia - Anti-fraud training

Croatia's Service for Combating Irregularities and Fraud in 2016 also developed a training needs analysis methodology for the period 2017- 2019. The main purpose of the methodology is to define the methods of identifying training needs of employees of AFCOS system bodies in order to design appropriate educational/training programs. Moreover, the main objective of the methodology is to identify topics that need to be addressed through future trainings of AFCOS system bodies. Identified topics will be included in the annual education plans of AFCOS system bodies.

Investigation and prosecution							

Lithuania - e-tool for criminal proceedings

Lithuania's Integrated Information System of Criminal Proceedings is an e-tool used for storing, managing and providing information related to criminal proceedings. Officials investigating criminal acts are entitled to make online recording and transmission of procedural documents, sanction necessary actions and communicate with prosecutors and judges in a fast manner to avoid wasting time for the signature, transmissions and sending of documents. The system is aimed at promoting cooperation and coordination of law enforcement and other institutions. The system stores information on criminal acts collected by pre-trial investigation institutions, instituted pre-trial investigations, conducted pre-trial investigations, data on pre-trial investigation cases and statistical information on pre-trial investigations. The measure targets the *prevention, detection, investigation and prosecution* stages of the anti-fraud cycle.

Detection							
Investigation and prosecution							

Hungary - Anti-fraud training

Hungary organised training on fraud prevention and detection for staff managing EU funds targeting the *prevention and detection* stages of the anti-fraud cycle in the area of *shared management*.

- ✓ At the Prime Minister's Office request the National Tax and Customs Administration's Anti-Fraud Coordination Service (the Hungarian AFCOS) organised training courses for some 800 people on 'Fraud prevention in the field of EU development policy'.
- ✓ Training for new recruits, organised by the Prime Minister's Office.
- ✓ Training organised for 190 people on 'Public service ethics and integrity' in cooperation with the National University of Public Service.
- ✓ The Prime Minister's Office organised in-house training for 83 people, introducing them to integrity systems.

Investigation and prosecution							

Netherlands - Fraud awareness

Netherlands took a series of actions to increase fraud awareness among staff:

- Organization of workshops to increase fraud awareness among the staff members by the Dutch Public Prosecution Office, and the inspection of the ESF to talk about fraud (with funds).
- Increasing awareness during work meetings on fraud, by for example, distributing OLAF documents amongst staff (such as ‘detection of forged documents in the field of structural actions’, and ‘Identifying conflicts of interests in public procurement procedures for structural actions – a practical guide for managers’.)
- The working program includes a file which must be filled in at every check, including a part on fraud risks.
- Staff members participated in a three day anti-fraud training course.

Austria - Central register of accounts

Austria adopted the Registration and Inspection of Accounts Act which requires the establishment of a central register of accounts and deposits for the purposes of tax, fiscal and criminal law. The register covers all current, investment and savings accounts and deposits held by Austrians and foreigners at Austrian credit institutions. This measure targeted the *prevention, detection, investigation and prosecution, recovery and sanction* stages of the anti-fraud cycle, in the areas of *financial crime, organised crime, fraud definition, customs/TOR/illicit trade*.

- ✓ detection and investigation of criminal corruption, where the risk of corruption is highest, with an emphasis on investigating criminal offences where the suspects are holders of public office and authority.
- ✓ training of criminal investigators to acquire knowledge of EU funds and familiarity with EU institutions in the fight against fraud.

Improving the enforceability of (compulsory) articles of the co-financing agreement, which must be used for calls for tender for European funding by bodies involved in implementing cohesion policy that work in the areas of labour, the family, social affairs and equal opportunities, economic development and technology, culture, public administration, justice, infrastructure, environment and spatial planning, education, science, sport and health.

3. ANTI-FRAUD MEASURES IN REVENUE BY THE MEMBER STATES

3.1 Fight against customs fraud

Denmark - National risk analysis

Denmark implemented a measure targeting the fraud *prevention and detection* stages in the area of *customs*. When risk analysis is carried out in Customs' analysis units, data is included from a number of sources, mainly declaration data from the Customs System. The data is analysed in the IT systems "Business Intelligence" (BI) and Tableau. Tableau is good at visualising trends and deviations in import patterns. The process of analysing data, mainly using declaration data in BI and Tableau, is a measure which SKAT introduced in 2016. Greater use of Tableau will support the work of detecting patterns of fraud.

Detection							

France - National risk analysis

France created the Risk Analysis and Targeting Department (SARC - within the Directorate-General for Customs and Indirect Taxation) in response to new challenges in the field of security, safety and the fight against fraud. This comes at a time when the flow of tax returns is being dematerialised and the new Union Customs Code implemented. It is tasked with analysing risks, determining national targeting criteria to be integrated into computing tools to facilitate controls, orienting controls and investigations, and fulfilling all requests for analyses related to fraud. This measure targeted the *prevention and detection* stages of the anti-fraud cycle in the area of *fraud definition, customs and shared management*.

Portugal - National customs risk assessment

Portugal linked up the entire goods-entry cycle to the national risk database (entry summary declaration, declaration for temporary storage and customs declaration). To handle this risk-analysis, assessment and mitigation work relating to safety, security and financial fraud, a National Risk Assessment Centre became fully operational; open 16 hours a day, six days a week, with increased staff numbers. This measure targeted the *prevention and detection* stages of the anti-fraud cycle in the areas of *financial crime, organised crime, smuggling/illicit trade*.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

Slovenia - National customs control strategy

Slovenia adopted a national customs control strategy, targeting the *fraud prevention* stage of the anti-fraud cycle in the areas of *financial crime and shared management*. Instructions on reporting established irregularities in the field of EU traditional own resources (TOR) laid down the procedures for reporting cases of fraud and irregularities affecting TOR where the amount at stake exceeds €10,000. This includes a requirement to appoint national coordinator(s)/operator(s) in organisational units, as well as deadlines and procedures for informing coordinators of new cases of fraud and irregularities and of action taken in relation to outstanding cases. The instructions also lay down an obligation to check eligibility, to follow up outstanding cases and to offer specialist assistance. A training course was organised on account of the introduction of VAT payments on imports.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

3.2 Fight against organised crime and anti-smuggling

Bulgaria - Fight against organised crime

Bulgaria's inter-departmental coordination centre for combating smuggling and monitoring movements of high-risk goods and freight, set up at the General Directorate Combating Organised Crime of the Ministry of the Interior by Council of Ministers Decree No 89 of 16 April 2015 was very active in 2016. The effective cooperation at inter-departmental level and the coordination by a single coordination centre of operational activities relating to established smuggling and tax abuse ensure that the competent state bodies can take immediate action in terms of risk analysis, identification of counter-measures and joint control activities to be carried out by law enforcement authorities, the National Revenue Agency, the Customs Agency and other public authorities.

Greece - Anti-smuggling

Greece amended the National Customs Code to strengthen the fight against the illegal trade in tobacco and set up a Coordination Centre for Combatting Smuggling. This measure targeted the *prevention, detection, investigation and prosecution* in the area of *customs/TOR/Illicit trade*. Greek legislation was harmonised with Council Decision 2009/917/JHA on the use of information technology for customs purposes. Directive 2014/40/EU on the approximation of the laws, regulations and administrative provisions of the Member States concerning the manufacture, presentation and sale of tobacco and related products was transposed into Greek law.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral
Prevention	Customs/TOR/illicit trade	Single	Legislative	N/A	Competences; powers; other administrative penalties	To clarify or consolidate existing rules; to remedy flaws; to enforce the rules in line with developments in EU law	S
Detection							
Investigation and prosecution							

Finland - Fight against economic crime

Finland's customs authority adopted an action plan to combat the shadow economy covering the period 2016-2020 in relation to the national strategy for reducing economic crime and the shadow economy. A key objective is to further improve risk management and controls to protect the EU's own resources. This measure targeted the *fraud prevention, detection, and investigation and prosecution* stages of the anti-fraud cycle in the area of *financial crime, organised crime, whistle-blowers, and customs/TOR/illicit trade*.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

3.3 Fight against tax evasion and VAT fraud

Bulgaria - Fight against tax evasion and VAT fraud

Bulgaria's National Revenue Agency (NAP) implemented a project under the Hercule III programme (OLAF/2016/D1/022) entitled "increasing the administrative capacity of the National Revenue Agency in the field of intra-Community trade by improving the interaction between administrations of EU Member States in the fight against tax fraud". 45 officials of the National Revenue Agency and the National Agency for Tax Administration of Romania participated in two workshops held under Action 1, to strengthen cooperation in the fight against VAT fraud and in the transport of high risk goods. An agreement was reached to carry out joint checks of high risk goods at the border between the two countries. As a direct effect of the fiscal control activities carried out during the last two years, the National Revenue Agency reports a BGN 1.5 billion increase in the tax base in connection with intra-Community acquisitions declared by firms carrying out imports of goods with high fiscal risk. The two countries agreed to carry out pilot joint inspections at the border check points Silistra-Ostrov and Danube Bridge 2 Vidin-Calafat, signed a Joint Action Protocol and prepared a three-year work programme.

Under Action 2, the National Revenue Agency of Bulgaria and the National Tax and Customs Administration of Hungary organised a working visit to Hungary for a target group of 28 officials, in order to enhance the mutual exchange of good practices between the two Member States and to strengthen administrative cooperation and exchange of operational information for planning and implementing effective national mechanisms in combating fraud affecting the financial interests of the European Union.

Czech Republic - Fight against tax evasion and VAT fraud

Czech Republic reinforced the position of the Czech Customs Administration as a police authority empowered to conduct criminal proceedings in the area of crimes linked to VAT evasion. Prior to that, the Customs Administration was only competent to conduct criminal proceedings relating to tax offences involving a cross-border element. The human resource burden on the Czech Police was reduced by making use of the expertise of the staff of the Customs Administration in conducting criminal proceedings. This measure targeted the *fraud detection, investigation and prosecution* stages of the anti-fraud cycle in the areas of financial crime and organised crime.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

Ireland - VAT reverse charge

Ireland introduced the VAT reverse charge for supplies of electricity and gas certificates. The reverse charge makes the recipient rather than the supplier accountable for the VAT on supplies. This ensures that the opportunity to generate significant false repayment claims in the sector is eliminated. This measure took effect from 1 January 2016 following the enactment of the Finance Bill 2015 and targeted the *fraud prevention* stage of the anti-fraud cycle and the area of *financial crime*.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reason for measure	Horizontal / sectoral

Ireland - Transparency on VAT numbers

In another related measure also targeting the *fraud prevention* stage of the anti-fraud cycle and the area of *financial crime*, **Ireland** gave the Revenue Commissioners the power to publish the fact that a person's VAT number has been cancelled to advise a person's supplier of the fact. This measure took effect in January 2016 after the enactment of the Finance Bill 2015 (December 2015).

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reason for measure	Horizontal / sectoral

Lithuania - Fight against tax evasion

Lithuania's State Tax Inspectorate is currently developing the Smart Tax Administration System (i.MAS) in order to increase the efficiency of tax administration and detection of tax fraud and fraudulent transaction as well as to reduce the taxpayer's burden. The i.MAS consists of 7 subsystems: e-invoice system (i.SAF); e-waybill system (i.VAZ); analysis, modelling and risk management subsystem (i. MAMC); smart cash registers (i.EKA); applied accounting system (i.APS); standard audit file for tax purposes (i.SAF-T) and smart control (i.KON). i. SAF and i.VAZ have been already put into operation as of October 2016. This measure targets the *prevention and detection* stage of the anti-fraud cycle with the objective of improving tax administration and tax collection and reducing the taxpayer's burden. It will enable faster detection of tax fraud chains and fraudulent schemes.

Detection							

Latvia - Fight against tax evasion

Latvia introduced amendments on the Law on Taxes and Duties and amendments on the Value Added Tax Law. The State Revenue Service has the right to remove the domain name of unregistered economic activity or failure to identify themselves when conducting business activities, as well as operating the suspension of the case; request to the web hosting service the termination (suspension) if the law is violated; and refuse to re-register the domain name of the taxpayer, if the tax audits is planned. In addition, the reverse VAT payment procedure now applies to mobile phones, tablets, laptops and integrated circuit devices; Cereals and industrial crops deliveries and precious metal supplies. This measure targets the *fraud prevention and fraud detection* stages of the anti-fraud cycle.

Poland - Fight against VAT fraud

Poland adopted relevant amendments in the area of accounting for VAT on intra-Community purchases of motor fuels in an Act of 7 July 2016 amending the VAT Act and certain other acts. This measure targeted the *prevention* stages of the anti-fraud cycle, in the area of *customs*. VAT must now be paid within five days of the day of entry of the motor fuel into Poland, an additional declaration must be submitted for intra-Community purchases of motor fuels, and tax warehouse keepers and registered consignees are now liable for the VAT.

4. SECTORAL ANTI-FRAUD POLICIES, MEASURES AND RESULTS BY MEMBER STATES - EXPENDITURE

4.1 Agriculture

Germany - Anti-fraud training

Germany participated in five seminars on ‘Fraud prevention within the framework of the CAP’, run by the Commission's Directorate-General for Agriculture and Rural Development with a total of 420 officials from the paying agencies. This administrative measure targeted the *fraud prevention and detection* stages of the anti-fraud cycle in the areas of *shared management and control of EU funds, anti-fraud or anti-corruption strategy*.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

Poland - Fraud risk analysis for agriculture

In **Poland**, an ordinance of the President of the Agency for Restructuring and Modernisation concerned the adoption of a policy for the fight against financial fraud in the Agency (ARiMR). The instrument is intended to optimise the fight against fraud by extending fraud risk analysis to the departments responsible for keeping the national register of agricultural producers and for field inspections. This measure targeted the *prevention and detection* stages of the anti-fraud cycle in the area of *shared management*.

Slovenia - Computerised accounting system

Slovenia developed a computerised accounting system (e-CA) for the certifying authority (MF-SUSEU/CA). Instructions were issued for the recovery of designated EU funds for the 2014-2020 programming period; and the risk register was updated. Agriculture in Slovenia (ARSKTRP) contributed to the amendment of the Agriculture Act (Zkme-1, currently at the coordination stage), which includes additional provisions on non-compliance with or infringement of obligations. The definition of infringements is more detailed, and in accordance with EU law, negligence is included as a form of inadmissible conduct, new legal bases are introduced for annulling decisions where no data or false data is submitted and a special processing procedure has been introduced for applications where there is a suspicion of irregularity.

In 2016 ARSKTRP held training courses for employees and managers on the system for preventing fraud and artificial creation of conditions. Employees at the Ministry of Agriculture, Forestry and Food underwent training on the system for detecting and preventing fraud. A manual of fraud indicators was produced in 2015 and in 2016 it was supplemented and updated by incorporating practical examples from the past. The list of administrative checks was also added to, with the inclusion of questions relating to suspicion of fraud.

United Kingdom - Anti-fraud strategies

The four **United Kingdom** paying agencies each have their respective anti-fraud strategies in place based on their own risk evaluations. The aim is to reduce the risk of fraud to an absolute

minimum. Safeguarding CAP funds is a key element of the strategic approach to prevent fraud. These strategies continued to be reviewed, renewed as needed and updated through 2016. Antifraud strategies are reviewed annually and signed off at senior level in accordance with corporate governance requirements and consistent standards across UK government departments.

Bulgaria - ARACHNE

Bulgaria also approved a procedure in connection with the provision of access to the risk scoring tool of the European Commission in the field of fraud and irregularities, ARACHNE, pursuant to Order No R-249/02.12.2015 of the Deputy Prime Minister for EU Funds and Economic Policy. ARACHNE is fed with information already in place and available in the Information System for Management and Monitoring of the EU Structural Instruments in Bulgaria (ISUN and ISUN 2020). In 2016, 51 users from all Managing Authorities were given access (via individual profiles) to ARACHNE. This measure targets the *fraud prevention and detection* stages of the anti-fraud cycle in the area of public procurement, conflict of interest and *shared management*.

Estonia - Risk assessment and analyses

In Estonia the implementing system, including different level entities and managing authorities, focused more on the risk of measures / projects, awareness-raising among officials and cooperation:

- simple procurement procedures are directed into the E-Procurement Estonia;
- a 'red flag' system is used for projects;
- all counterparts participate in the joint training courses and joint discussions.

This measure targets the *prevention and detection* stage of the anti-fraud cycle in the area of *shared management* (agriculture and cohesion policy).

Ireland - ERDF anti-fraud measures

Ireland implemented anti-fraud measures for ERDF operational programmes. As required under EU Regulation 1303/2013 governing the ESI Funds, Managing Authorities must put in place effective and proportionate anti-fraud measures. These have been introduced for the two regional OPs in Ireland as part of their management and control systems. They include an anti-fraud policy, fraud assessment procedures and a risk register. The Commission's anti-fraud data mining tool - Arachne will also be used under this funding round and has been referred to in the

anti-fraud policy. This measure targets the *prevention and detection* stages of the anti-fraud cycle in the areas of *public procurement, corruption, conflict of interest, AFCOS, shared management and control of EU funds*.

Croatia - Irregularity management

Croatia's Minister of Finance adopted guidelines on Irregularity Management in the context of Structural instruments and ESI Funds drafted by the Service for Combating Irregularities and Fraud. According to Article 5(3)a of the Regulation on the Institutional Framework of the System for Combating Irregularities and Fraud (OG 144/2013), Irregularity Reporting System bodies are obliged to follow procedures which are described within the Guidelines concerned.

The purpose of the guidelines is to prescribe procedures for prevention, detection treatment, reporting and follow up of established irregularities related to the use of Structural instruments and ESI Funds. This measure targets the *fraud prevention and detection* stages of the anti-fraud cycle in the area of *AFCOS*.

Italy - Preventing fraud in fisheries

Italy introduced a more appropriate range of penalties for illegal fishing in order to restore credibility to the system by enhancing the preventive function of punishments. In particular, the possession, landing, transshipment, carriage and marketing of undersized fish species ('juveniles') was decriminalized. Law No 154/16 (delegations to the Government and further dispositions in subject of simplification, rationalization and competitiveness of the sectors agricultural and agro-food, as well as sanctions in subject of illegal fishing) amends Legislative Decree No 4/2012 (the reference legislation in the field). Administrative fines exist for unlawful acts ranging from EUR 1 000 to EUR 75 000, which are doubled in the event of offences concerning bluefin tuna and swordfish. For fishing, marketing and purveyancing of undersized fishing products of the latter two species, additional penalties have been laid down, such as suspension of the fishing licence for three to six months and withdrawal in the event of repeat offences.

Cyprus - Fraud Risk Self-Assessment Tool

Cyprus established the Certified Authority within the Treasury of the Republic of Cyprus as regards ESIF and the Food and/or Basic Material Assistance Programme. The Authority has applied the EU Fraud Risk Self-Assessment Tool in respect of the Fund Management and Control System and the impact of specific fraud scenarios. Memoranda, instructions, guidelines and an action plan will be drafted. Procedures for various bodies (IB/MA) to report irregularities, sanctioning, and recovering sponsorship are applied. Also, application of procedures by the Certified Authority of the Treasury of the Republic of Cyprus is followed in respect of public contracts.

Luxembourg - ARACHNE

Luxembourg has recommended testing of the Arachne tool to the ERDF managing authority in view of a possible adoption of the tool. This measure targets the *detection* stage of the anti-fraud cycle in the area of *conflict of interest and fraud definition*. The European Regional Development Fund's Management Authority, the Ministry of Economics, and European Social Fund's Managing Authority, the Ministry of Labour, are both currently implementing and testing the Arachne tool. If it reveals to be sufficient in matters of data (for Luxembourg), it would be installed definitively. For now, only one user in each Ministry is testing it, in tight collaboration with the Commission's services. The use of Arachne would help to identify

possible conflict of interests (beneficiary versus supplier, for example), and/or possible suppliers that have or are still facing financial or legal problems. Monitoring this data would help to eliminate future issues with the beneficiary supply chain.

Luxembourg - Fraud Risk Self-Assessment Tool

Luxembourg implemented a fraud prevention measure in the field of public procurement for ESPON (European territorial observation network). Following the risk analysis implemented at programme level, it was detected that one of the major areas of risk consisted in the implementation of public procurement by the Single Beneficiary of the Programme. A series of provisions were therefore established and the Single Beneficiary was asked to comply. The Managing Authority requested the Single Beneficiary to report on the implementation of these measures and implemented additional checks to verify their efficacy and efficiency. This measure targeted the *prevention* stage of the anti-fraud cycle in the area of *public procurement*

Netherlands - ARACHNE

Netherlands decided to carry out a second pilot of Arachne, following the positive results of the first pilot. This measure targets the *prevention and detection* stages of the anti-fraud cycle in the area of *shared management*. **Netherlands** also carried out a Fraud Risk Assessment for ERDF in June 2015. The results, conclusions and findings were set out in a final note discussed in September 2016 in a consultation with all the parties concerned. It was agreed in the consultation to carry out the Fraud Risk Assessment every two years, with the next one due in the first quarter of 2017. The European Commission has drawn up an anti-fraud directive for the 2014-2020 programming period. The Member State must ensure that its measures comply with the Directive. For the designation audit and subsequent system audit, the audit authority has established that the system is working, with a few improvements being necessary. As a result of this Directive, the management authority has, for example, appointed a fraud officer and a fraud risk assessment is carried out every year.

Austria - Verification procedure

Austria carried out numerous verifications pursuant to Article 125(4) of Regulation 1303/2013 for the 2014-2020 programming period to prevent irregularities. The verification procedure allows the administrative bodies to check all the expenditure submitted by the beneficiary. Random checks are planned in relation to overheads. A delegated act supplementing Regulation 1303/2013 was adopted by the Commission on 8 July 2015 with regard to the procedure for the notification of irregularities. The purpose is to monitor and ensure the proper use of funds and the notification of irregularities identified.

Formal requirements in the national rules on eligibility and in the management and control system should increase efficiency. Standardised forms (check-lists) improve the quality of the accounts submitted. Standardised forms have also been developed for the calculation of personnel costs in order to increase transparency and clarity. The entire funding operation, including the accounting process, is stored in a central database. In addition, the Arachne data-mining tool, provided by the Commission, is used for risk evaluation and risk analysis. This measure targeted the *prevention, detection; recovery and sanction* stages of the anti-fraud

cycle, in the areas of *conflict of interest, shared management and anti-fraud or anti-corruption strategy*.

Poland - IT tools in Public Procurement

Poland set up and put into operation the Competition Database (Baza Konkurencyjności), an IT tool for the implementation of competition rules as regards the eligibility of expenditure under the ERDF, ESF and CF programmes in the period 2014-20. The Database is web-based and intended for posting calls for tenders. It has been launched with a view to ensuring compliance with rules on competition and the transparency of procurement procedures not covered by the Public Procurement Act. This measure is expected to increase the number of tenders in procurement procedures not covered by public procurement legislation resulting in particular in lower prices, greater transparency of such procedures and enhanced public scrutiny. This measure targets the *prevention* stage of the anti-fraud cycle in the area of *public procurement and shared management*.

Slovenia - Computerised accounting system

Slovenia's Ministry of Finance and Department for Management of EU Funds (MF-SUSEU), developed a computerised accounting system (e-CA) for the certifying authority (MF-SUSEU/CA); issued instructions for the recovery of designated EU funds for the 2014-2020 programming period; and updated the risk register. The e-CA application serves to verify data in requests for payments from EU funds, maintain accounting records of requests submitted to

the European Commission and keep records of repayments made to the national budget from EU funds. The application incorporates key Commission rules and requirements for auditing expenditure. At the same time the application also includes checks by the CA to uncover potential irregularities before the EU contribution is paid to the national budget and before the statement of expenditure to be sent to the Commission is drawn up. This measure targets the *prevention, detection, investigation and prosecution* stages of the anti-fraud cycle in the areas of *procurement, financial crime, definition, AFCOS and shared management*.

In a cross-cutting measure, the enforceability of (compulsory) articles of the co-financing agreement are improved. These must now be used for European funding calls for tender by bodies involved in implementing cohesion policy in the areas of labour, family, social affairs and equal opportunities, economic development and technology, culture, public administration, justice, infrastructure, environment and spatial planning, education, science, sport and health. The scope for recovering funds where there are ineligible costs arising from identified irregularities is increased and the prevention and detection of irregularities (including fraud) against EU funds/cohesion policy is strengthened.

Finland Anti-fraud training

Finland organised anti-fraud training for the national authorities responsible for managing EU structural funds and agricultural funds. The managing authority of the structural funds organised training for the intermediate bodies at both national and regional level. The intermediate bodies also included fraud risk assessment in the risk evaluation of the management and control system. Specific anti-fraud training was also organised for the EMFF authorities and the training activities continued with the EU paying agencies in the agricultural aid and rural development funds. This measure targeted the *fraud prevention, detection,*

investigation and prosecution, recovery and sanction stages of the anti-fraud cycle in the area of shared management.

Sweden Economic crime and risk analysis

Sweden's SEFI Council is made up of nine authorities working for the protection of the EU's financial interests in Sweden. The Economic Crime Authority is responsible for the SEFI Council's offices and during the year it visited three different managing authorities to inform the management and staff of the Council's work. The Economic Crime Authority has also carried out fraud prevention training events at four managing authorities. The meetings and training events of the Economic Crime Authority have promoted active fraud prevention in several authorities and stressed the importance of reporting suspected crime. This measure targeted the *fraud prevention, detection, investigation and prosecution* of the anti-fraud cycle in the area of *shared management*.

Detection							
Investigation and prosecution							

Sweden's managing authorities for the ESF and the ERDF adopted their respective policies and strategies for combating fraud, based on the Commission's guidance on crime prevention. Risk assessment teams were also set up to conduct risk analyses and draw up action plans based on these analyses. This measure targeted the *fraud prevention and detection* stages of the anti-fraud cycle in the area of *shared management*.

United Kingdom ARACHNE

United Kingdom implemented several regional anti-fraud measures. The European Regional Development Fund Operational Programme for England – Anti-Fraud Policy was published in 2016. In order to detect fraud, the Managing Authority uses IT tools (e.g. ARACHNE) to detect risks and ensures that staff are aware of fraud risks and receive anti-fraud training. Prompt reviews of all cases of suspected fraud are carried out promptly to enable improvements to the internal management and control system, including recommendations from the Government Internal Audit Authority. Best practice is regularly reviewed at cross-departmental meetings. This measure targeted the *fraud prevention and detection* stage of the anti-fraud cycle in the area of *shared management*.

Anti-fraud cycle steps	Area covered	Single / Package	Type of Measure	New / Amendment	Scope	Reasons for measure / expected results	Horizontal / sectoral

Detection							

The Welsh European Funding Office (WEFO) formally adopted ARACHNE in early 2015 and continued use through 2016. It is a powerful risk-scoring tool generating more than 100 risk indicators sorted into specific categories designed to strengthen WEFO's ability to detect and prevent errors, irregularities and incidences of fraud amongst beneficiaries, their operations and procured delivery of EU funded activities. ARACHNE is further enriched by data provided by WEFO from its operational programmes on a monthly basis. WEFO's use of ARACHNE adds another layer to the minimum standards set out by the Welsh Government's GCoE to minimise errors and fraud in managing its programmes and has been integrated into its Statement of Management Controls. ARACHNE is now part of WEFO's standard due diligence processes at the appraisals stage of development for all operations and is also used by the MVT for pre-planning of their inspection visits. It therefore plays a key part of work undertaken by TFAT who are responsible for carrying out investigations, reviews and other ad-hoc work.

The existing processes set out by the GCoE and the use of ARACHNE is complimented by a specific WEFO Anti-Fraud Risk Register developed as required by EC regulations. The risk register, one of five used by WEFO, is managed by a group that meets periodically to review existing controls and assess their effectiveness. Additional controls are introduced if the net risk is considered too high. The register is based on a template register created by the EC and adapted to fit to WEFO's controls. It focuses primarily on procurement processes as this is considered to be the area where the risk of fraud is high. This is consistent with our experience over recent years, particularly with organisations in the Third Sector. For that reason, in addition to the controls in the template register WEFO have placed an emphasis on operations being run in the Third Sector and have introduced Interim Reviews of the beneficiaries twice annually during the operational stage of the operation.
