EXPLANATORY MEMORANDUM

1. The Community and the Republic of Korea (hereinafter “Korea”) have similar research priorities, such as life sciences and technologies, information society technologies and telecommunications, industrial and materials technologies, sustainable development, renewable energy sources, satellites, Earth observation, etc. and both are also members of ITER, the International Thermonuclear Experimental Reactor.
2. Korea is committed to strengthening its research base and annually invests almost 3% of its GDP in this field.¹ Therefore Korea is a very important partner for Europe to cooperate with in the area of science and technology.
3. Considering the importance of science and technology for economic and social development in Europe and Korea, both parties expressed the desire to upgrade and intensify their co-operation in areas of common interest:
 - In May 2003, during his meeting with Mr. Busquin in Brussels, the Korean Science Minister, Mr. Park expressed Korea’s wish to negotiate a scientific and technological cooperation agreement in order to enhance and strengthen scientific and technological cooperation.
 - In October 2003, the Korean Mission to the European Union officially informed the Commission services of Korea's desire to open negotiations on a scientific and technological cooperation agreement
 - On 7 March 2005, the Council authorised the Commission to negotiate an Agreement for scientific and technological cooperation between the European Community and Korea. The negotiations resulted in the attached agreement initialled on 21 December 2005.
4. The Agreement is based on the principles of mutual benefit, reciprocal opportunities for access to each other’s programmes and activities relevant to the purpose of the Agreement, non-discrimination, the effective protection of intellectual property and equitable sharing of intellectual property rights.
5. It shall be concluded for an initial period of five years and be tacitly renewed, subject to the recommendation of an external independent evaluation carried out during the penultimate year of each successive five-year period.

¹ Korea R&D investment (2002): 2.91% of GDP, 15 billion €

6. In the light of the above-mentioned considerations, the Commission proposes that the Council:
- Approves on behalf of the European Community the decision on the signature, and after the consultation of the European Parliament,
 - Approves the decision on the conclusion of the Scientific and Technological Cooperation Agreement between the European Community and Korea.

The Community's financial audits will be carried out either by its own staff or by accounting experts approved according to the law of the audited party. The Community will choose the latter freely, while avoiding any risks of conflicts of interest which might be indicated to it by the party subject to the audit.
