Proposal for a

COUNCIL REGULATION

setting up a network for the collection of accountancy data on the incomes and business operation of agricultural holdings in the European Community (codified version)

(presented by the Commission)

EXPLANATORY MEMORANDUM

1. In the context of a people's Europe, the Commission attaches great importance to simplifying and clarifying Community law so as to make it clearer and more accessible to the ordinary citizen, thus giving him new opportunities and the chance to make use of the specific rights it gives him.

This aim cannot be achieved so long as numerous provisions that have been amended several times, often quite substantially, remain scattered, so that they must be sought partly in the original instrument and partly in later amending ones. Considerable research work, comparing many different instruments, is thus needed to identify the current rules.

For this reason a codification of rules that have frequently been amended is also essential if Community law is to be clear and transparent.

2. On 1 April 1987 the Commission therefore decided¹ to instruct its staff that all legislative acts should be codified after no more than ten amendments, stressing that this is a minimum requirement and that departments should endeavour to codify at even shorter intervals the texts for which they are responsible, to ensure that the Community rules are clear and readily understandable.

3. The Conclusions of the Presidency of the Edinburgh European Council (December 1992) confirmed this², stressing the importance of codification as it offers certainty as to the law applicable to a given matter at a given time.

Codification must be undertaken in full compliance with the normal Community legislative procedure.

Given that no changes of substance may be made to the instruments affected by codification, the European Parliament, the Council and the Commission have agreed, by an interinstitutional agreement dated 20 December 1994, that an accelerated procedure may be used for the fast-track adoption of codification instruments.

4. The purpose of this proposal is to undertake a codification of Regulation No 79/65/EEC of the Council of 15 June 1965 setting up a network for the collection of accountancy data on the incomes and business operation of agricultural holdings in the European Economic Community³. The new Regulation will supersede the various acts incorporated in it⁴; this proposal fully preserves the content of the acts being codified and hence does no more than bringing them together with only such formal amendments as are required by the codification exercise itself.

¹ COM(87) 868 PV.

² See Annex 3 to Part A of the Conclusions.

³ Carried out pursuant to the Communication from the Commission to the European Parliament and the Council – Codification of the Acquis communautaire, COM(2001) 645 final.

⁴ See Annex II to this proposal.

5. The codification proposal was drawn up on the basis of a preliminary consolidation, in all official languages, of Regulation No 79/65/EEC and the instruments amending it, carried out by the Office for Official Publications of the European Communities, by means of a data-processing system. Where the Articles have been given new numbers, the correlation between the old and the new numbers is shown in a table contained in Annex III to the codified Regulation.

Proposal for a

COUNCIL REGULATION (EC) No [.../..]

of [...]

setting up a network for the collection of accountancy data on the incomes and business operation of agricultural holdings in the European Community (codified version)

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular the third subparagraph of Article 37 (2) thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament¹,

Whereas:

↓

- (1) Regulation No 79/65/EEC of the Council of 15 June 1965 setting up a network for the collection of accountancy data on the incomes and business operation of agricultural holdings in the European Economic Community² has been substantially amended several times³. In the interests of clarity and rationality the said Regulation should be codified.
-

↓ 79/65 Recital 1

- (2) The development of the common agricultural policy requires that there should be available objective and relevant information on incomes in the various categories of agricultural holding and on the business operation of holdings coming within categories which call for special attention at Community level.

¹ OJ [...], [...], p. [...].

² OJ 109, 23.6.1965, p. 1859/65.

³ See Annex II.

↓ 79/65 Recital 2

- (3) The accounts of agricultural holdings constitute the basic source of essential data for any assessment of incomes on agricultural holdings or study of their business operation.
-

↓ 79/65 Recital 3 (adapted)

- (4) The data collected should be obtained from agricultural holdings specially and suitably selected in accordance with common rules and be based on verifiable facts. Such data should reflect technical, economic and social conditions on the holdings involved, be taken from individual holdings, be available as quickly as possible, be based on uniform definitions, be presented in a common form and be usable at all times and in full detail by the Commission.
-

↓ 79/65 Recital 4 (adapted)

- (5) Those objectives can be attained only by means of a Community network for the collection of farm accountancy data , hereinafter referred to as ‘data network’ , based on the farm accountancy offices existing in each Member State, enjoying the confidence of the parties concerned and relying on their voluntary participation.
-

↓ 2143/81 Recital 3 (adapted)

- (6) In order to obtain accounting results that are sufficiently homogeneous at Community level, the returning holdings should be distributed among the various divisions and the various categories of holdings on the basis of a stratification of the field of survey based on the Community typology for agricultural holdings as established by Commission Regulation (EC) No 1242/2008⁴ .
-

↓ 2143/81 Recital 9 (adapted)

- (7) The divisions of the data network should , as far as possible, be identical with those used for the presentation of other regional data that are essential in order to provide guidelines for the common agricultural policy.
-

↓ 79/65 Recital 5 (adapted)
and 2059/2003 Recital 2 (adapted)

- (8) For management reasons, the Commission should be authorised to amend the list of divisions of Member States , at the request of a Member State.
-

↓ 2801/95 Recital 2 (adapted)

- (9) The field of survey of the data network should comprise all agricultural holdings of a certain economic size, irrespective of any outside work the operator may
-

engage in. This field should be re-examined periodically in the light of the new Farm Structure Survey data.

↓ 2801/95 Recital 3 (adapted)

- (10) Returning holdings should be selected in accordance with the rules laid down in the context of a selection plan aimed at obtaining a representative accounting sample of the field of survey.
-

↓ 2143/81 Recital 6

- (11) In view of the experience gained, it is desirable that the main decisions concerning the selection of returning holdings, particularly the establishment of the selection plan, should be adopted at national level. Consequently, it is at that level that a body should be made responsible for this task. Those Member States which have several divisions should, however, be free to maintain regional committees.
-

↓ 2143/81 Recital 7 (adapted)

- (12) The national liaison agency should play a key role in the management of the data network.
-

↓ 79/65 Recital 6

- (13) In selecting agricultural holdings and analysing and evaluating the data collected it is necessary to refer to data derived from other sources.
-

↓ 79/65 Recital 7 and 1256/97
Recital 1 (adapted)

- (14) Farmers should be given an assurance that their accounts and all other individual details obtained in implementation of this Regulation will not be used for taxation purposes or for purposes other than those provided for in this Regulation or divulged by persons participating or having participated in the Community farm accountancy data network.
-

↓ 79/65 Recital 8 (adapted)

- (15) In order that it may satisfy itself as to the objectivity and relevance of the data collected, the Commission should be in a position to obtain all necessary details concerning the manner in which the bodies entrusted with the selection of agricultural holdings and the accountancy offices participating in the Community farm accountancy data network discharge their duties and, if necessary, to send experts to work on the spot with the collaboration of the competent national authorities.
-

↓ 2059/2003 Recital 3

- (16) The data network is a useful tool which enables the Community to develop the common agricultural policy and it serves, as a consequence, the Member States as well

as the Community. The costs of the computerised systems on which the network relies and of studies and development activities of other aspects of the network, should therefore be eligible for Community financing.

- (17) The measures necessary for the implementation of this Regulation should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission⁵,
