COMMISSION

Proposal for a Regulation of the European Parliament and of the Council on the Common Procurement Vocabulary (CPV)

(2002/C 25 E/01)

(Text with EEA relevance)

COM(2001) 449 final — 2001/0179(COD)

(Submitted by the Commission on 3 August 2001)

THE EUROPEAN PARLIAMENT AND THE COUNCIL
OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 47(2) and Articles 55 and 95 thereof,

Having regard to the proposal by the Commission,

Having regard to the opinion of the Economic and Social Committee,

Having regard to the opinion of the Committee of the Regions,

Acting in accordance with the procedure referred to in Article 251 of the Treaty,

Whereas:

- (1) The use of different classifications is detrimental to the openness and transparency of public procurement in Europe. Its impact on the quality of notices and the time needed to publish them is a *de facto* restriction on the access of economic operators to public contracts.
- (2) In its Recommendation 96/527/EC ⁽¹⁾, the Commission invited contracting entities and authorities to use the Common Procurement Vocabulary (CPV), developed on the basis of certain existing classifications with a view to gearing them more closely to the particular features of the public procurement sector, when describing the subjects of their contracts.
- (3) There is a need to standardise, by means of a single classification system for public procurement, the references used by the contracting authorities and entities to describe the subject of contracts in accordance with European Parliament and Council Directives ... of ... on the coordination of procedures for the award of public supply contracts, public service contracts and public works contracts ⁽²⁾ and ... of ... coordinating the procurement procedures of entities operating in the water, energy and transport sectors ⁽³⁾, and Commission

Directive ... of ... on the use of standard forms in the publication of contract notices.

- (4) The Member States need to have a single reference system that uses the same description of goods in the official languages of the Community and the same corresponding alphanumeric code, thus making it possible to overcome the language barriers at Community level.
- (5) A revised version of the CPV therefore needs to be adopted under this Regulation as the single classification system to be used henceforth in the public procurement sector instead of the classifications used hitherto;
- (6) Tables must also be drawn up showing the correspondence between the CPV and the Statistical Classification of Products by Activity in the EEC (CPA), the Provisional Central Product Classification (CPC Prov.) of the United Nations, the General Industrial Classification of Economic Activities within the European Communities (NACE Rev. 1) and the Combined Nomenclature (CN).
- (7) The structure and codes of the CPV may need to be adapted or amended, in the light of developments in the markets and users' needs. A suitable revision procedure must therefore be established.
- (8) Under Article 2 of Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission ⁽⁴⁾, the measures needed for implementing this Regulation must be laid down according to the advisory procedure described in Article 3 of that Decision.
- (9) In accordance with the principles of subsidiarity and proportionality as set out in Article 5 of the Treaty, the aim of the activity envisaged, i.e. to draw up a classification system for public contracts, may, because of the Commission's powers as regards the alignment of legislation, be best achieved at Community level. This Regulation is limited to the minimum required to achieve this objective.

⁽⁴⁾ OJ L 184, 17.7.1999, p. 23.

(10) A Regulation has been chosen rather than a Directive, as the establishment of a classification system for public contracts does not require implementation by the Member States,

HAVE ADOPTED THE FOLLOWING REGULATION:

Article 1

1. For the purpose of applying Directives ... and ..., this Regulation establishes a single classification system applicable to public contracts, known as the 'Common Procurement Vocabulary' or 'CPV'.

2. The CPV is set out in Annex I.

3. The tables showing the correspondence between the CPV and the Statistical Classification of Products by Activity in the EEC (CPA), the Provisional Central Product Classification (CPC Prov.) of the United Nations, the General Industrial Classification of Economic Activities within the European Communities (NACE Rev. 1) and the Combined Nomenclature (CN) are set out in Annexes II, III, IV and V respectively.

Article 2

The provisions governing the revision of the CPV will be adopted by the Commission in accordance with the procedure described in Article 3(2).

Article 3

1. The Commission will be assisted by the Advisory Committee on Public Contracts set up under Article 1 of Council Decision 71/306/EEC ⁽¹⁾.

2. If reference is made to this paragraph, the advisory procedure described in Article 3 of Decision 1999/468/EC will apply, without prejudice to Articles 7 and 8 of that Decision.

Article 4

This Regulation will enter into force on the twentieth day following the date on which it is published in the *Official Journal of the European Communities*.

This Regulation is binding in its entirety and directly applicable in all the Member States.

⁽¹⁾ OJ L 185, 16.8.1971, p. 15, last amended by Council Decision 77/63/EEC of 21 December 1976 (OJ L 13, 15.1.1977, p. 15).

ANNEX I

COMMON PROCUREMENT VOCABULARY (CPV)

Structure of the classification system

1. The CPV consists of a main vocabulary and a supplementary vocabulary.
2. The main vocabulary is based on a tree structure comprising codes of up to nine digits associated with a wording that describes the supplies, works or services forming the subject of the contract.

The numerical code consists of 8 digits, subdivided as follows:

- the first two digits identify the divisions;
- the first three digits identify the groups;
- the first four digits identify the classes;
- the first five digits identify the categories.

Each of the last three digits gives a greater degree of precision within each category.

A ninth digit serves to verify the previous digits.

3. The supplementary vocabulary may be used to expand the description of the subject of a contract. The items are made up of an alphanumeric code with a corresponding wording allowing further details to be added regarding the specific nature or destination of the goods to be purchased.

The alphanumeric code is made up of:

- a first level comprising a letter corresponding to a section;
- a second level comprising four digits, the first three of which denote a subdivision and the last one being for verification purposes.
