EXPLANATORY MEMORANDUM

The EU Mexico FTA¹, within its Annex III implementing preferential rules of origins, foresees a limited number of *rendez vous* clauses with a view to extending (or evaluating the opportunity of extending) the application of temporary origins rules negotiated by the parties as an exception to standards preferential rules of origins².

By the initiative of Mexico, parties have examined the opportunity to extend the temporary rule of origin to certain chemicals products of heading 2914 and 2915 originating in Mexico, for three more years. Such discussion concluded with an extension of three more years of the temporary rule of origins from the EU while Mexico accepted to compensate such a concession with an acceleration of the phasing out of duties for certain chemicals products originating in the Community.

In practical terms, this agreement will permit, on the one hand, the maintaining of the preferential regime under the EU/Mexico FTA (that since 1 January 2003 grants duty free treatment to all industrial products originating in Mexico) for certain chemicals products of heading 2914 and 2915 originating in Mexico. The trade flow for those products had an estimated value of 62.000.000 € in 2002. On the other hand, the chemical products originating in the Community, listed in the annex to the proposed Joint Decision, will benefit from a duty free treatment before the agreed tariff dismantling schedule (2005 and 2007). The trade flows for those products have an estimated value of 40.000.000 € in 2002.

The Commission therefore recommends the Council to adopt the enclosed Council Decision as the EU Common position on the mentioned EU/Mexico Joint Council Decision as soon as possible so as to allow the EU exports to benefit from duty free treatment in Mexico.
